About This Game

Perso is an atmospheric puzzle game. Collecting relics within each level will slowly reveal what and where you are. You will be in control of at least five cubes, each with different abilities. Use them all to find your way.

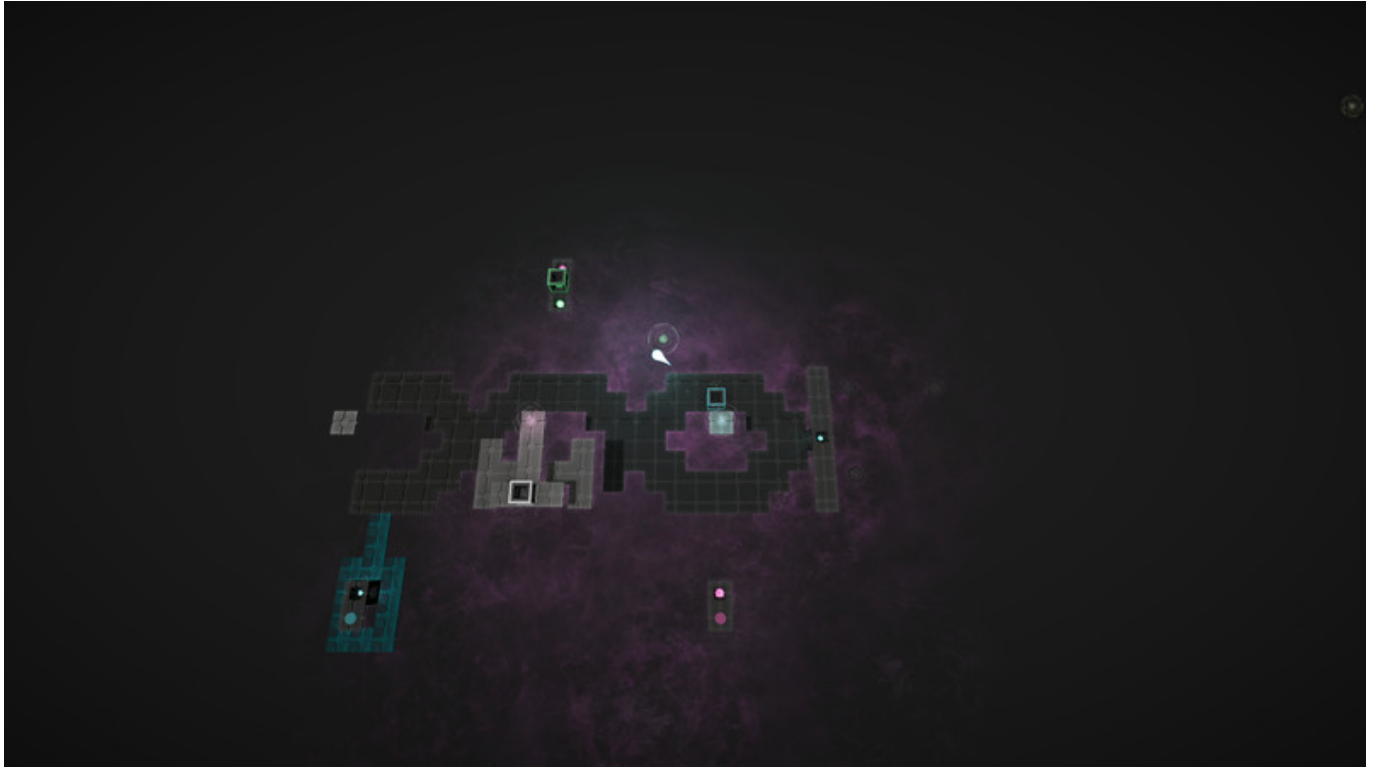

You will need to approach each level in different ways to solve the puzzle. Changing your direction will change the layout of the world, opening up pathways or letting you fall. Take control and use all of your abilities to find new ways of staying alive.

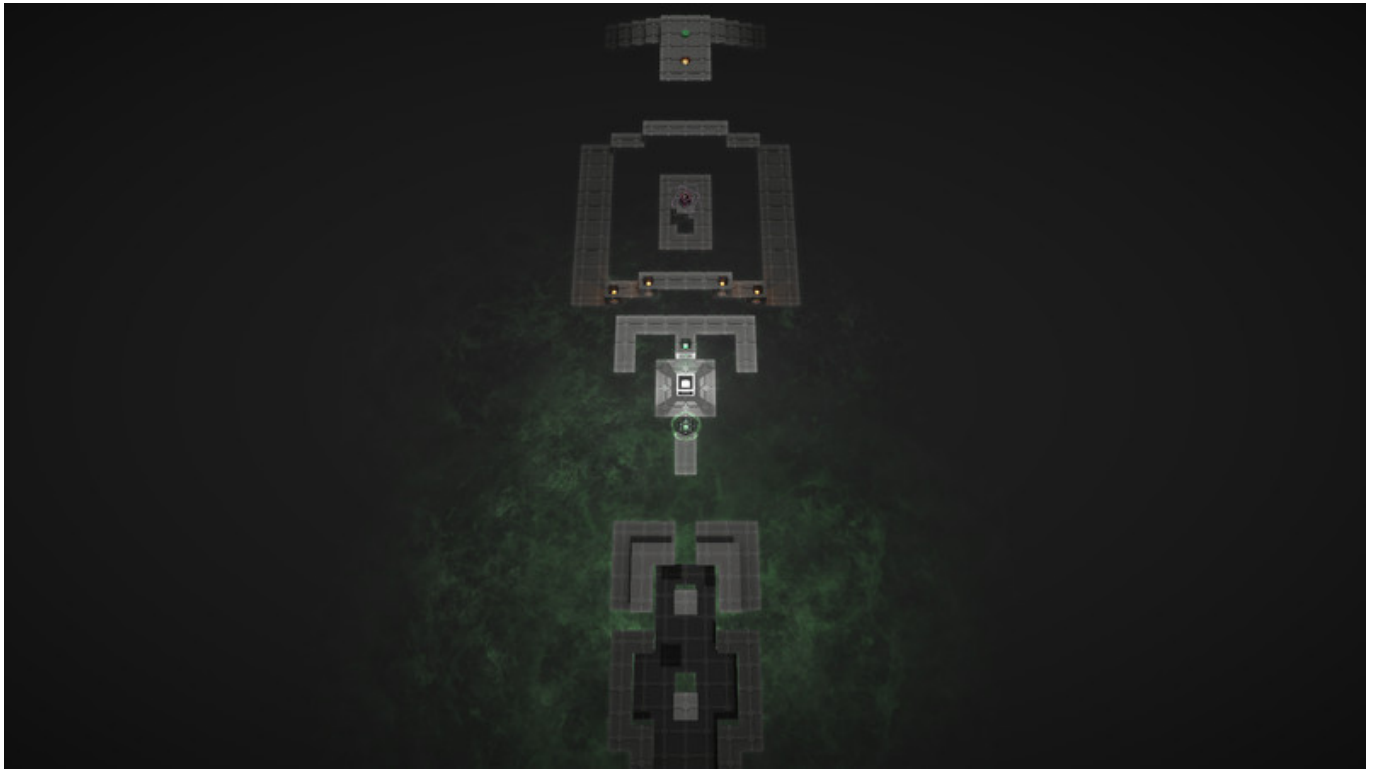

Collecting the relics in each level is your goal. These relics will ultimately lead you to a decision.

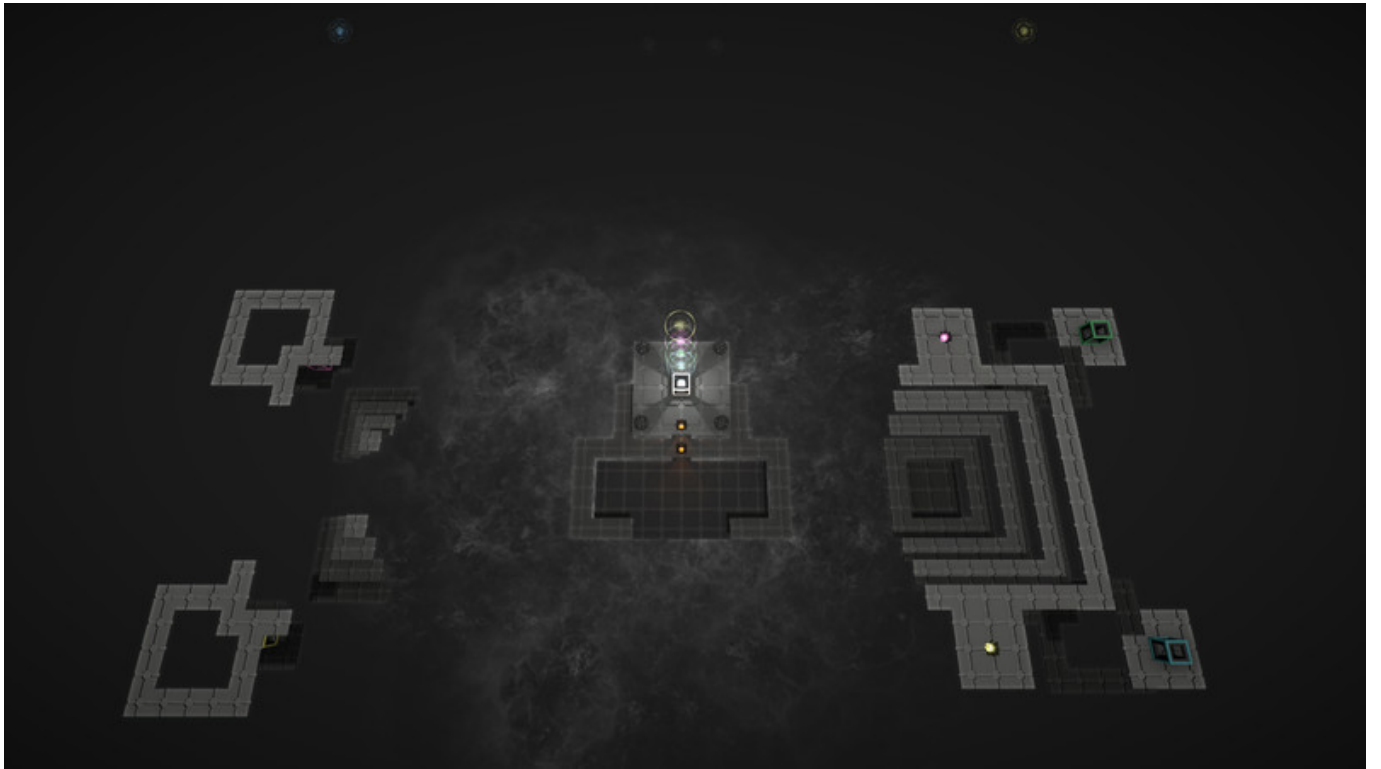

Title: Perso
Genre: Casual, Indie
Developer:
Crepe Studios
Publisher:
Crepe Studios
Release Date: 20 Apr, 2017

b4d347fde0

English

I really liked this, definitely recommend it if you are at all interested in puzzle games. It's very smooth (with a great art style), it oozes mystery and intrigue \u2013 and of course clever puzzles.

Pros

- A clever system of puzzle-solving involving 5 blocks with unique abilities, such as teleporting or moving across immaterial platforms
- Great art style with lots of polish
- A set of controls, individually quite simple, which combine to be very challenging \u2013 forcing you to really think about each move you make

Cons

- There are a few bugs in version 1.0, such as occasionally losing control of the characters (the blocks) and checkpoints seemingly activating before they're supposed to. Restarting usually solves this.
